Education

International Institute of Information Technology, Hyderabad

Bachelor of Technology in Electronics and Communication Engineering — *Aug. 2023 – May 2027*

Relevant Coursework: Data Structures & Algorithms; Operating Systems & Algorithms; Intro to Processor Architecture; Probability & Random Processes; Computer Programming; Statistical Methods in AI; Linear Algebra; Intro to Coding Theory

Work Experience

MontyCloud, Inc. — Bangalore,India

Software Engineering Intern — *May 2025 – July 2025*

- Led a four-member team to design and implement a multi-agent system for rapid, compliant feature deployment on the MontyCloud DAY2 platform.
- Engineered compliance-check solutions using Amazon Strands SDK and AWS MCP server (with human-in-the-loop), increasing SME efficiency by **90%** and reducing code development time by **86%** through CI/CD integration in existing pipelines.
- Accelerated compliance engine testing by **95%** through AWS MCP-driven multi-agent workflows.
- Implemented Infrastructure as Code using AWS services for testing.
- Contributed high-level architectural enhancements to additional DAY2 platform modules.
- Implemented RESTful APIs using FastAPI, AWS SAM, and Serverless Framework, supporting **200+** requests per minute with **99.99%** uptime for critical business functions.

IIIT Hyderabad — Hyderabad,India

Undergraduate Teaching Assistant — *August 2025 – December 2025*

- Teaching Assistant — Real Analysis (MA4.101), Assisted in teaching core topics in real and complex analysis, including sequences, series, mean value theorems, vector calculus, differential equations, and complex variables. Supported students through tutorials, coursework, and academic guidance.

Achievements

JEE Mains 2023: All India Rank **1693 (top 0.14%)** out of over 1.6 million candidates, **99.86%ile**
Codeforces Specialist title with a peak rating of **1534 (Id: devansh_236)**
KVPY SA 2022: Achieved All India Rank **1904**, qualifying for national-level scholarship
BITSAT 2023: Ranked among **top 1000 (0.3%)** (Score: 330/390), out of 300k+ test-takers
Graduated **Class 12** with **95.6%** and **Class 10** with **98%** in CBSE Board Examinations

Technical Skills

Languages: Python, C/C++, SQL (MySQL), HTML/CSS, MATLAB, Verilog HDL
Frameworks: Strands Agents SDK, LangChain, FastAPI,React, Node.js, Flask,
Developer Tools: Git, Postman, AWS CLI, VS Code, Visual Studio, PyCharm, Docker
Libraries: pandas, NumPy, Matplotlib
Cloud Platforms: Amazon Web Services (AWS)
EDA & Simulation Tools: LTSPICE, NGSPICE, MAGIC
CERTIFICATIONS: AWS Cloud Practitioner Essentials • Mastering System Design (GeeksForGeeks)

Projects

C++ Banking Management System —*C++17, STL, OOP, File I/O, Design Patterns, Memory Management*

- Built a C++ based banking system with object-oriented design, inheritance hierarchies, and STL containers. Implemented customer authentication, multi-account management, transaction processing with rollback capabilities, and financial analytics using modern C++ features including smart pointers, RAII, and lambda expressions.

Movie Ticket Marketplace —*React.js,Python, FastAPI, REST APIs, AWS Serverless, Docker, Netlify,Localstack*

- A full-stack serverless web application for movie ticket transactions. React.js frontend with custom hooks, context API, and theme switching deployed on Netlify. FastAPI backend with Python AWS Lambda functions and DynamoDB storage. Infrastructure managed using AWS SAM/Serverless Framework with Docker/LocalStack for local development.

Multi-Agent Investment Portfolio Analysis —*Python, Multi-Agent Architecture, LLM Integration, API Integration*

- Developed agentic portfolio analysis system with 5 specialized agents for preference collection, data fetching, AI analysis, and report generation. Integrated Kite Connect and Gemini APIs with error handling and rate limiting. Built automated reporting engine generating personalized investment strategies and risk assessments based on real-time portfolio data and user preferences.

Agentic Last Mile Logistics & Situation Handler — *Agentic AI, LLM, SLM, Multi layered architecture*

- Built a scalable last-mile delivery system using LLM+SLM agents with RAG+MCP, reducing coordination cost and enabling real-time adaptive decisions. Designed a non-monolithic, multi-layer architecture with task-specific SLMs (preventing hallucinations), guardrails for secure policy enforcement, and locally hosted agents to safeguard sensitive data while supporting multi-task scalability.

Positions of Responsibility

Corporate Team Head — Felicity 2025, IIIT Hyderabad (Annual Cultural Festival) 2024–2025
Corporate Team Head — The Game Theory, IIIT Hyderabad 2024–Present
Soft Skills: Effective communicator and leader, adaptable, with strong critical thinking, problem-solving, and continuous learner.
Extracurriculars: Part of College Football Team, Part of Choreography Team,The Dance Crew IIITH
